

## FIVE-STAR VASOCAINE

### For Use by Licensed Professionals Only

This liquid 4-ounce anesthetic comes with a spray top. This powerful 5% Lidocaine liquid anesthetic is for use during procedures. It is ineffective on intact skin. It is safe for use on all procedures *except eyeliner*. It also contains a vascular constrictor to reduce swelling and bleeding.

**Five-Star Vasocaine** is a highly effective secondary anesthetic for use during painful procedures. It is fast-acting and has no burn when applied to open skin.

**FOR EXTERNAL USE ONLY:** Check with client for history of allergic reactions to topical anesthetics before applying. Keep in a cool, dark place, *out of reach of children*.

**WARNINGS:** 1) Avoid direct contact with the eyeball. If contact should occur, irrigate with sterile saline, and seek medical attention. 2) **DO NOT SWALLOW.** If you should accidentally swallow this product, seek medical attention immediately. 3) Always remove product from the skin prior to a procedure.

SUGGESTED APPLICATION	DURING PROCEDURE ANESTHETIC	90 seconds
	This product is highly effective on broken skin. Use <b>Five-Star Vasocaine</b> during tattooing, piercing or other broken skin procedures. Where speed of anesthesia and ease of use are important, just spray, let it sit for 90 seconds, remove the product from the skin and you are ready to continue your procedure. Because of the added ingredient of a vascular constrictor, you will also experience a reduction in bruising and bleeding with this product. Do not reapply to previously treated areas while working.
